JARVIS-OS — one page

A voice-first AI assistant for smart glasses. Software finished. Hardware missing.

THE ASK

■1,71,709 (≈ US$1,960) for prototype hardware only. Non-dilutive. Invoices filed for every rupee; unspent balance returned.

WHAT ALREADY WORKS

Voice in → speech-to-text → decision → spoken reply → action on the machine. Four agent voices, permission-gated host automation with an append-only audit log, on-demand 3D holograms, real-time webcam hand-gesture control, and an OAuth model path that costs nothing per query. 24 automated tests pass headless. A bootable image exists.

WHAT IT IS NOT YET

It has never run on a wearable. No glasses-mounted build, no on-device inference, no field trial. Desk software ≈ TRL 6; the wearable product is ≈ TRL 3. That gap is what this money closes.

WHERE THE MONEY GOES

Item	Purpose	■
Pixel 10a 8/256	Pocket inference host — offline, zero per-query cost	49,999
Ray-Ban Meta Gen 2	The wearable target: microphones, camera, open-ear audio	42,100
Jetson Orin Nano Super 8 GB	30 FPS gesture tracking and hologram rendering	42,000
Quectel EC200U 4G + SIM	Standalone cellular calling path	3,500
WebRTC TURN relay, 12 mo	Two-way audio through NAT	12,000
Power & field rig	A full demo day on battery	6,500
Contingency 10%	Duty, price movement, one replacement	15,610
Total		1,71,709

SCHEMES THAT FIT (status verified 5 Nov 2026)

NIDHI-PRAYAS 2.0, DST — up to ■20 L via a PRAYAS Centre. Priority areas name “Hardware-based Artificial Intelligence” and “assistive devices”. Individual innovator may apply without a company. No fee, no equity. **MeitY TIDE 2.0** — ■7 L EiR / ■25 L seed via 51 incubators, needs an incorporated entity. **TANSEED 9.0** — next window ≈ Dec 2026. **SISFS** — closed to new applications since 31 May 2026.

WHAT I WANT FROM YOU

1. The date of your next innovator call, and the format you want the proposal in.
2. A 15-minute slot. I will demonstrate the working system live, not slides.
3. If this is out of scope for you — one introduction to someone it is in scope for.

Applicant: individual innovator · DPIIT recognition in progress · No prior government grant above ■40 L · IP fully owned by the applicant · Software contributed at no cost to the grant.
